Intramammary

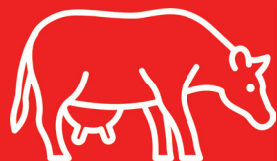

Dairy and cattle

HDB is the global market leader for both standard and tailor-made intramammary syringes.

Thanks to our extensive experience and know-how, we have been able to constantly improve on the design of our intramammary syringes, resulting in excellent functionality, perfect quality and maximum end-user friendliness.

Our standard range of intramammary syringes consists of the following dosing volumes: 4.5 ml up to 30 ml.

Veterinary intramammary

Veterinary Oral Paste Syringe

HDB specializes in the production of both standard and tailor-made oral paste syringes. These syringes have a wide nozzle, making them exceptionally well-suited for the oral administration of gels, creams and vitamin pastes to horses and sheep.

Our oral paste syringes consist of four components: barrel, cap, plunger and dosing ring.

Standard dosing volumes: 5.5 ml up to 60 ml.

Oral dosing

OTC/Prescription

Dispensing spoons are a thing of the past! HDB has come up with a new dispensing system to replace the dispensing spoon.

Our oral dosing applicators are available in the following standard dosing volumes: 0.5 ml, 1 ml, 2 ml, 3 ml, 5 ml, 10 ml and 20 ml.

HDB is very pleased to be able to offer you the all-in-one package: CRC/TE closure, plug, oral dosing syringe, sealing cap and clip. This enables you to buy all the required components for the administration of oral solutions from a single supplier.

Intimate care

Intimate care

HDB is an innovator in gynaecological medical devices. We have therefore developed two standard types of vaginal applicators. Our 5 ml vaginal applicator with M9 / M11 screw thread can be screwed onto tubes, allowing the end-user to administer gels and creams smoothly. In addition, we have a vaginal applicator without a thread, which is more suited for inserting capsules and pills.

If you have a design or an idea for a new development in this field, we would be happy to hear from you.

Together with our R&D department, we will further elaborate on your idea.

Ophthalmics

Ophthalmics

The HDB eye-dropper combines an ideal drop rate with a perfect drop size. Our eye-dropper is also perfectly suitable for blow-fill-seal production.

Our eye-dropper components are produced in our state-of-the-art cleanroom and can be subjected to gamma-irradiation afterwards.

Features

- Medical grade materials
- Cleanroom production and assembly
- Customized packaging DPTE®
- Beta port containers / bags
- Suitable for gamma-irradiation
- Optimal drop rate and perfect drop size
- Tip and cap suitable for blow-fill-seal production

Realizing your ideas

We specialize in the development and production of custom medical devices. Our R&D team works in close partnership with your medical and technical experts to translate ideas into high-performance, regulatory-compliant products.

With a strong track record in tailor-made healthcare solutions, we support numerous clients in turning complex requirements into reliable, manufacturable designs. From surgical instruments to diagnostic components, our custom projects meet the highest standards of functionality and safety.

Thanks to advanced CAD systems, we provide accurate 2D and 3D visualizations to support rapid prototyping, testing, and mould manufacturing. Continuous innovation and technical excellence are the cornerstones of our market-leading position in custom device development.

Quality

Quality is key

The key to our success is a quality-centred culture at every level from product development over production to logistics.

Our quality system is dedicated exclusively to the pharmaceutical sector. We work together to provide you with customized quality documents and reports, allowing you to register your pharmaceutical product.

By means of a quality agreement, we can define specific requirements regarding the quality of our products. By enhancing our quality management system we ensure you of the best possible quality.

Quality

Exceptional production standards

Our cutting-edge manufacturing facility provides you with quality, capacity, flexibility, efficiency and assured supply.

Our certified quality management system is built to meet the highest industry standards:

- ISO 9001:2015 (Quality management systems)
- ISO 13485:2016 (Medical devices)
- ISO 15378:2017 (Primary packaging materials for medicinal products)
- DMF available for dosing applicators for human use
- Registered FDA facility
- The Medical devices Regulations 2002 (UK Medical Device Regulation)
- Regulation (EU) 2017/745 (Medical Device Regulation)

To make sure all employees work according to our quality management system, we provide them with training on a regular basis. Every single process step has a built-in quality control which starts with analysis of incoming materials.

Our production processes are monitored by the production operators via in-process controls (IPC) including visual, dimensional and functional inspection.

On top of that, our Quality Control team checks that we comply with customer specifications, to ensure that all our products are of excellent quality. They perform a recheck of all IPCs and carry out additional tests, as agreed with the customer:

- Leak testing
- Specific dimensions
- Drop rate tests
- ...

We have two cleanrooms that have a combined surface of 3888 m². Both human and veterinary applications can be produced in our cleanrooms (class ISO 7).

Because, at HDB, excellence is not an act. It's a habit.
